

## Teacher Level Questions to ask about the Forefront Screening Assessment results

Looking at the Standards View report:

This report groups related assessment items under the heading of a particular standard.

- Which students are basic or below basic on a given standard?
- Are there groups of students who are basic or below basic on a similar set of standards?

Looking at the Item Analysis report:

The Item Analysis report gives information for individual assessment items.

- Which students are basic or below basic on a set of items?
- Are there groups of students who are basic or below basic on a similar set of items?
- How does the Standard View report and the Item Analysis report compare?

Looking at the Growth report:

- Which students are growing at or above the desired rate? Why is that?
- Which students are not growing at the desired rate? Why is that?
- Is the rate of students which are receiving interventions greater than that of students within core only in order to close the gap in learning?

General

- What support do these identified students need to be successful by the end of the year?
