

System Level Questions to ask about the Forefront Screening Assessment results.

Looking at the Standards View report:

- Is there a pattern of standards which many students aren't becoming proficient or advanced on? What are the implications for core instruction that all students receive? What are the implications for the intervention system?
- Are we meeting more of the standards now than at the previous testing season? If so, why is that? If not, why is that?
- Are we meeting more of the standards now than a year ago at this time? If so, why is that? If not, why is that?

Looking at the Item Analysis report:

- Are there areas where we are successful? Why is that?
- Are there areas where we are not successful? Why is that?

Looking at the Growth report:

- Are students growing at the expected rate... or better? Why is that? If not, why is that?
- What system-wide changes can be made to better support learning?
